

Test 7—Question 4: Problem Solving

- 4 Look at the diagram of Gina’s rectangular garden below.

$$\begin{aligned}\text{Area of rectangle} &= lw \\ &= \text{length} \times \text{width}\end{aligned}$$

Gina has 52 flowers. She wants to plant 2 flowers in every square foot. On the lines below, explain if she has enough space for all of the flowers. Be sure to include the area of the garden in your explanation.
